

Appendix for Voting Item No. 9

FAQs

Welcome to the Southeast Metro Stormwater Authority

The Authority's mission is to maintain, improve and construct new stormwater infrastructure to help minimize flooding, and to safeguard water quality by monitoring and reducing pollutants that enter local waterways.

WHAT'S NEW

New Stormwater Authority Considered — The City of Centennial along with Arapahoe County and several special districts in the area are considering an agreement to form a new, independent entity which would more effectively manage stormwater. To learn why stormwater management is important, what the new entity would do, and how the new stormwater fee would be instituted — please explore this site. We welcome your questions and feedback.
