Mr. John McCarty
Southeast Metro Stormwater Authority
76 Inverness Dr. E, Suite A
Centennial, CO 80121

Dear Mr. McCarty,

I wanted to express my appreciation for the work recently completed on Little Dry Creek Trail and the adjacent drainage area. My home looks out directly over this area, with views of the open field and the creek. I spoke with Scott, your engineer, when the signs went up, and he explained the purpose of the project to me. The construction crew did an outstanding job of keeping the site clean and safe while working. Toward the end, my husband and I went out to see the results, and they showed us their work and explained the way it made the area both safer and better in terms of storm run-off.

The final grading makes for a more natural and attractive open area and, with the addition of the trees and willows planned for spring planting, we will see a greatly improved view. We are especially protective of the natural habitat for birdlife in this area, and I believe that what you have done will enhance the habitat for birds and waterfowl.

Please thank your people for a job well conceived and well executed.

Sincerely,

A handwritten signature in cursive script that reads "Michele Bloom". The signature is written in dark ink and has a long, sweeping horizontal line extending to the right.

Michele Bloom
